Release Hubs

Upgraded Specification. Increased Performance.

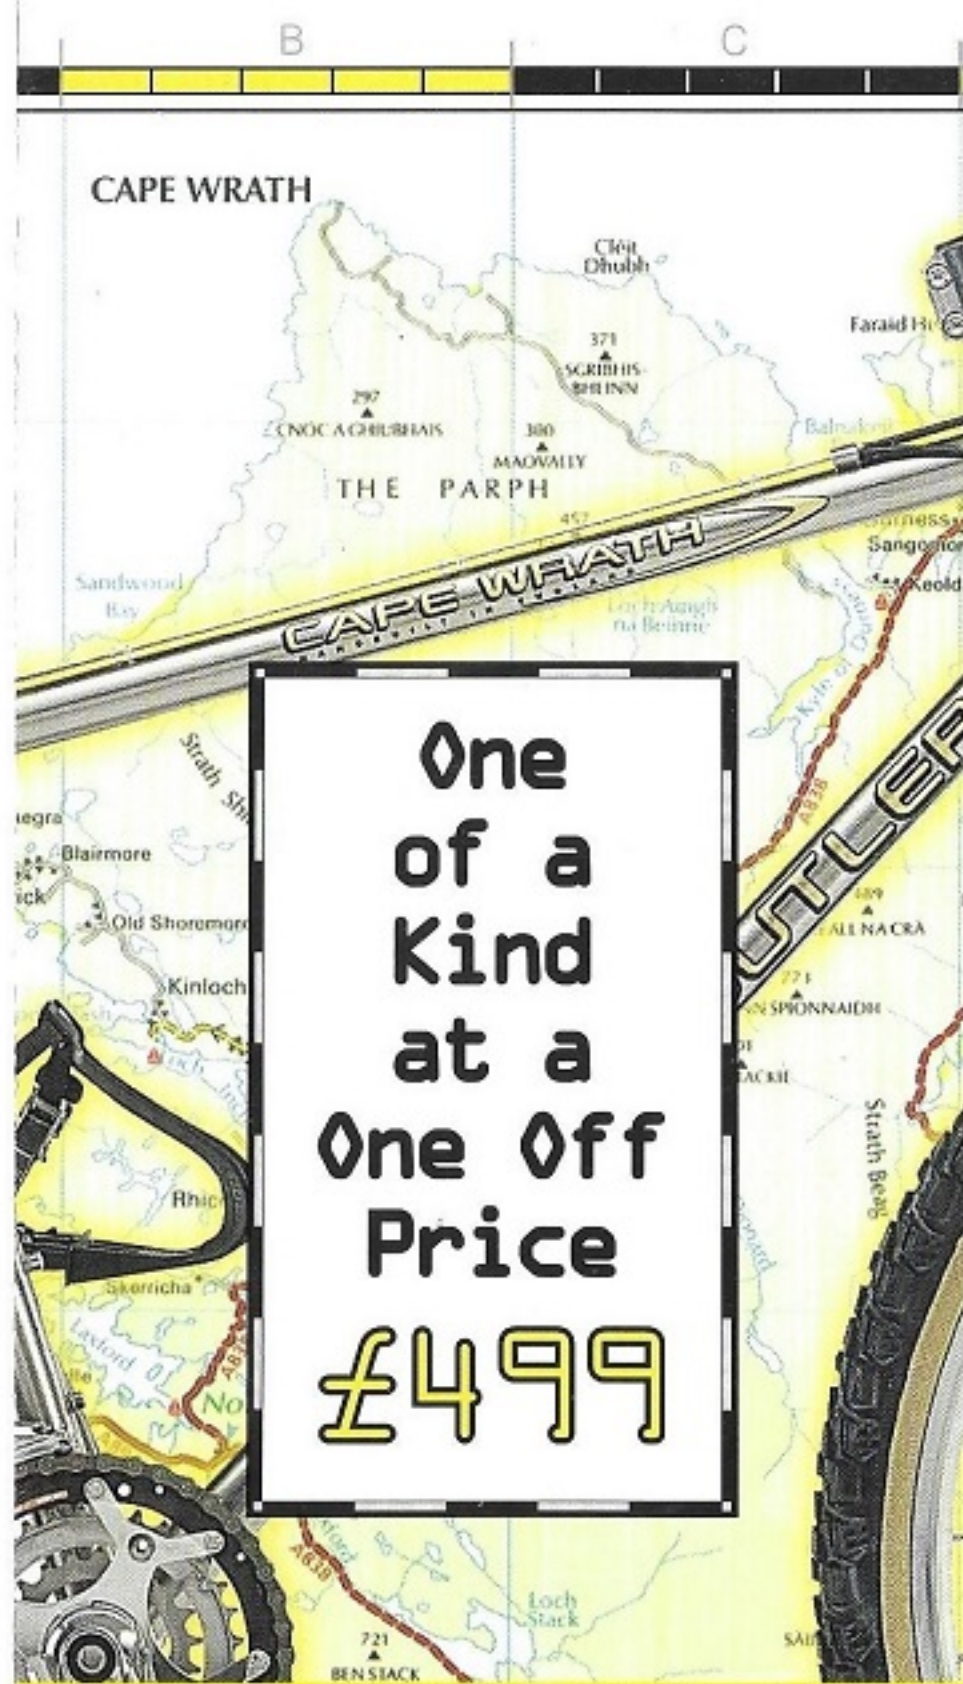

Cast your eye over the features and you'll know the performance will match the pedigree. At the heart of the upgraded specification is the tough double butted chrome tubing frame. The rugged frame and Rock Shox suspension ensure you'll coast over the roughest terrain while the chain set and 24 speed gears put power just where it's needed. Brakes, handlebars and stem are top quality for serious cycling; saddle, hubs and tyres are to a standard on a par with top of the range cycles. And the price is as amazing as the performance...

Built for Life Guaranteed for a Lifetime

Falcon and Claud Butler can trace their roots well into the early days of cycling history. We have built upon our reputation for premium quality and performance, aspects we are totally committed to.

This handcrafted cycle is a product of today's high tech material and precision engineering combined with the best traditions of craftsmanship. In this way and through continuous development we continue to meet the most exacting of standards, as you would expect of a company with our pedigree.
