made in the UK

www.hopetech.com

- Closed system
- 'On the fly' pad adjustment
- Uses closed version of Pro lever
- Wide selection of calipers to fit most mounts
- Disc available to fit either 4, 5 or 6 bolt pattern hubs
- Weight - 470g for complete system

“Highly adjustable, great value all-rounder”

What Mountain Bike

Winter 2001

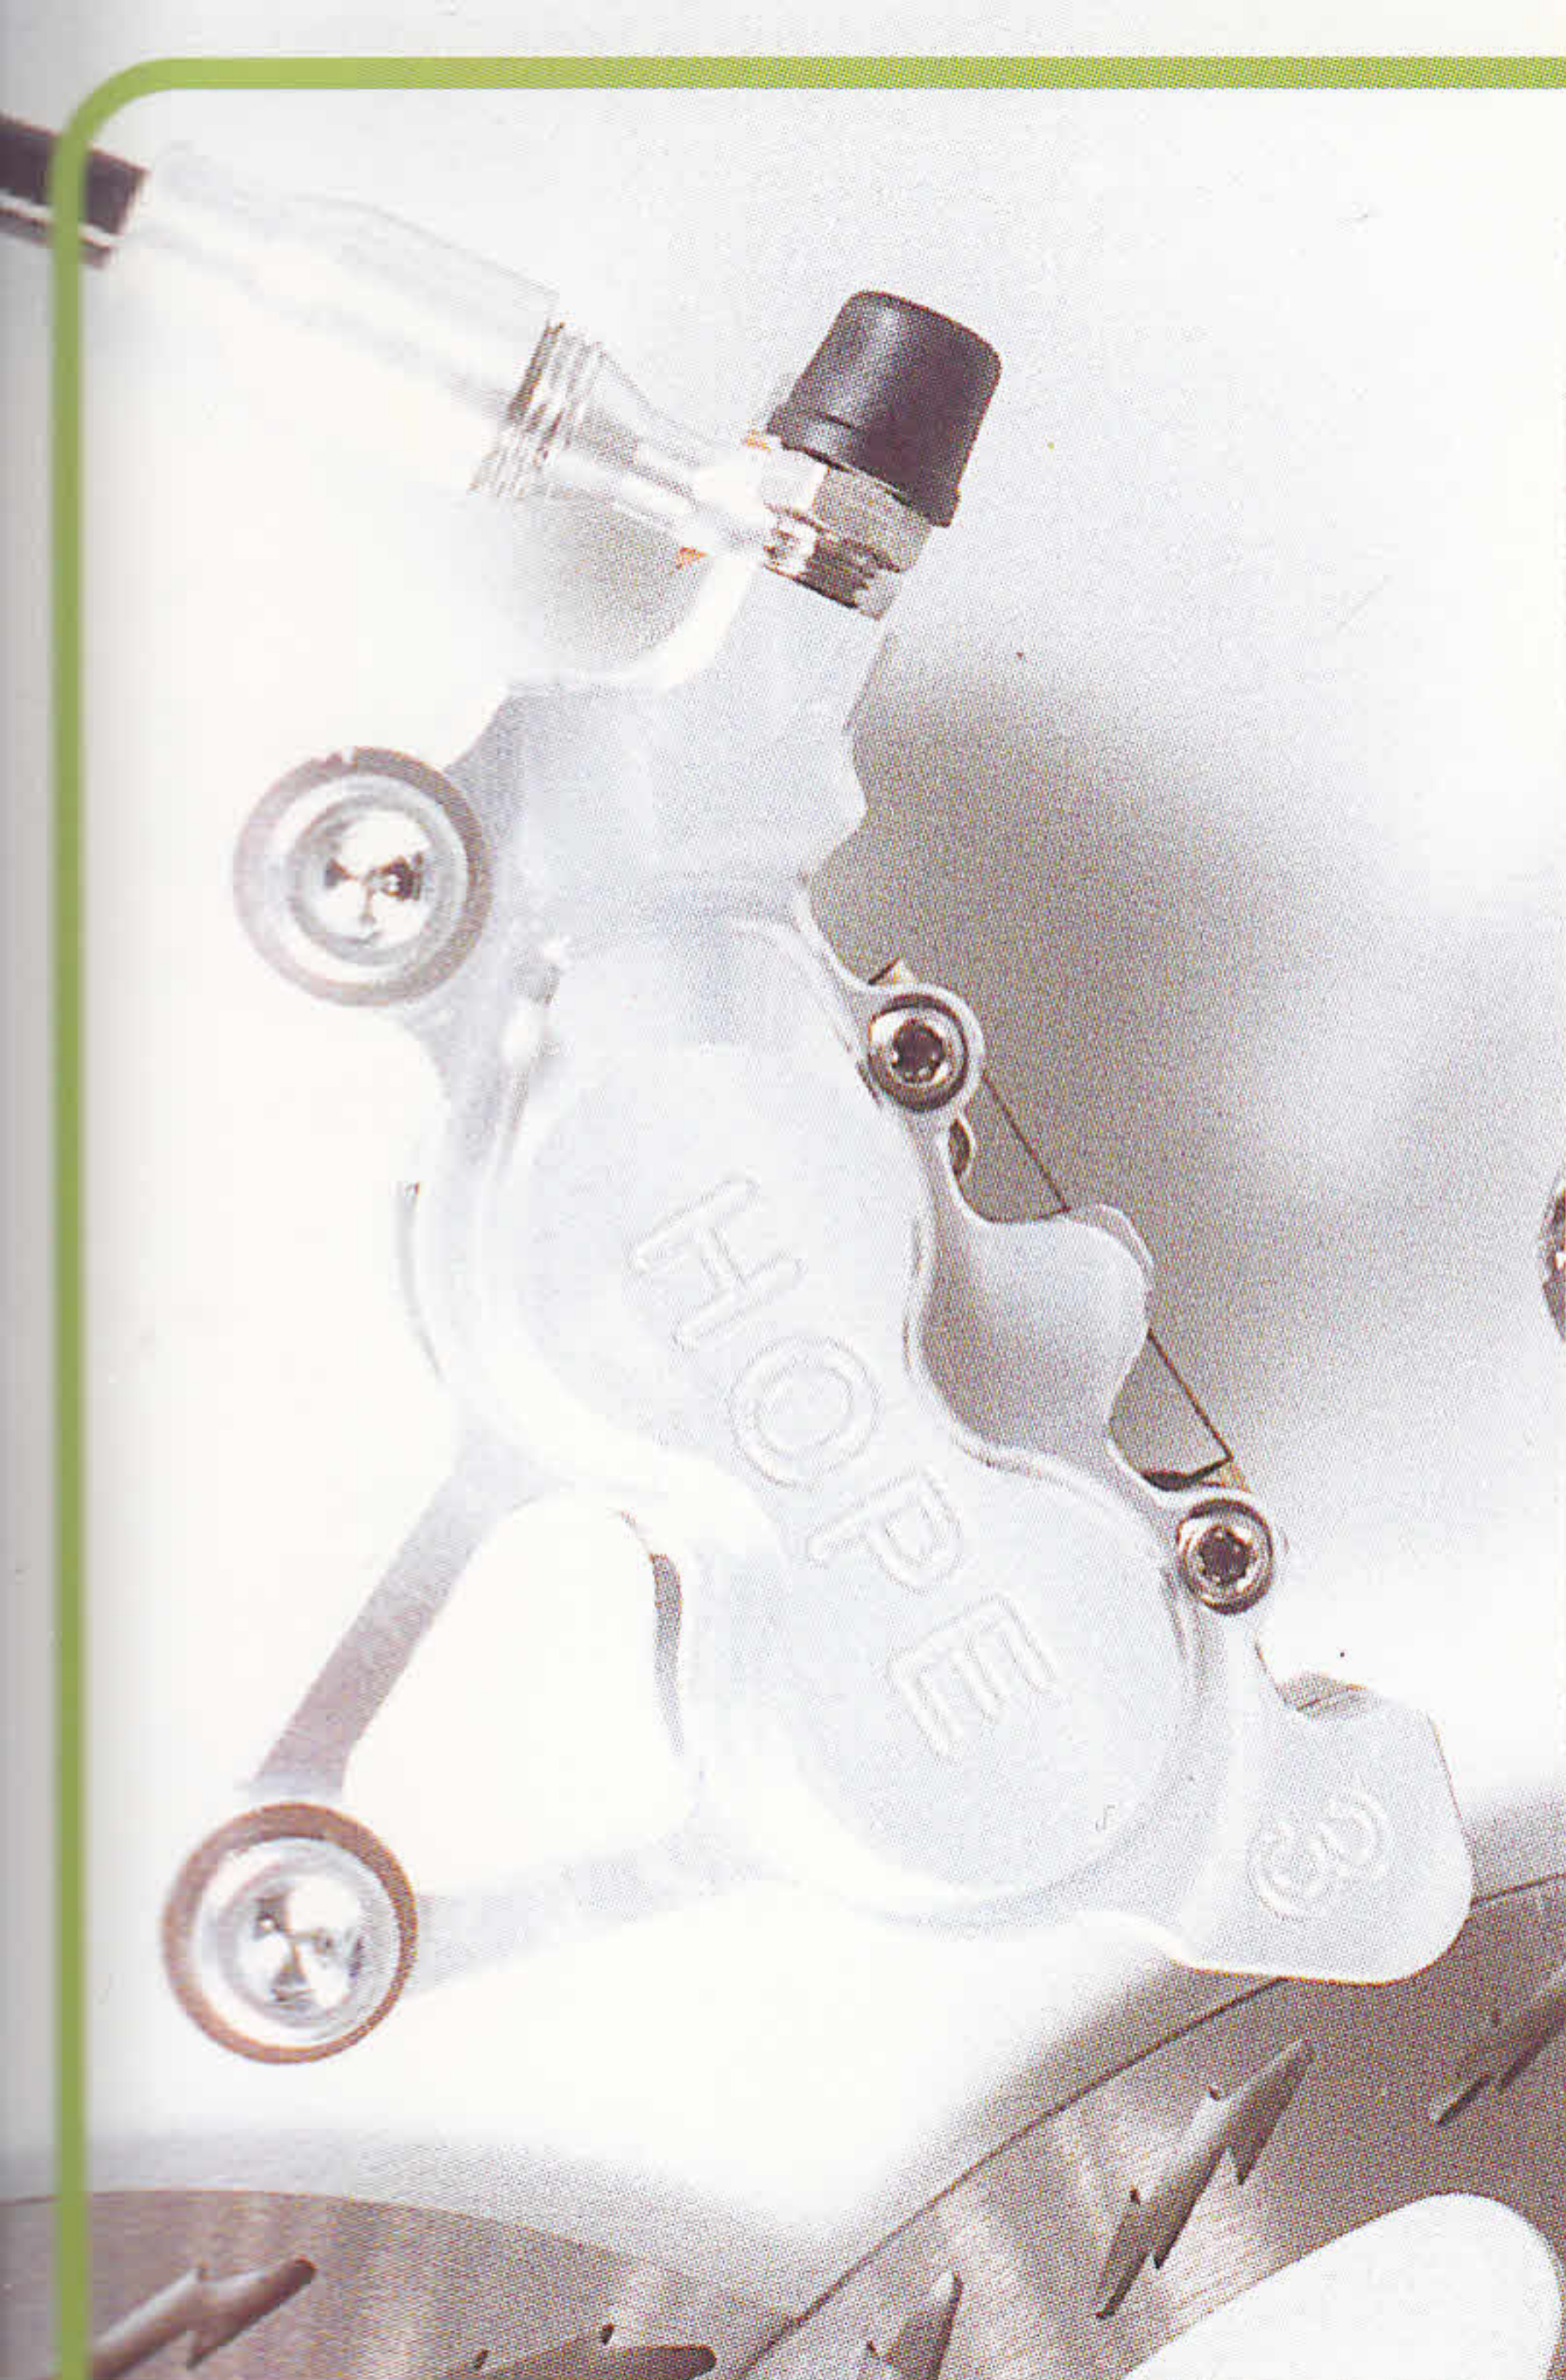

Enduro 4

- Open system - no lever pump
- Uses open version of Pro lever
- Self adjusting
- Light enough for XC yet powerful enough for the severest DH
- Disc available to fit 4, 5 & 6 bolt pattern hubs
- Narrow caliper to give clearance on all hubs
- Weight - 470g for complete system

“For maximum anchorage the Hope Enduro 4 is king”

What Mountain Bike
Winter 2001

Mini

- Newest addition to Hope's range
- Open system - no lever pump
- Self adjusting
- Lever design unique to mini
- Smooth progressive braking
- Light enough for XC yet powerful enough for DH
- Disc available to fit 4, 5 & 6 bolt pattern hubs
- Narrow caliper to give clearance on all hubs
- Only 380g for the complete brake

“If anyone asks me about V's or disks now, I can only say that if you don't have discs then you're at a definite disadvantage.”

Paul Lasenby

Pro XC rider after his first race on the Minis

XC4

- Closed System
- 'On the fly' pad adjustment
- Uses closed version of Pro lever
- Disc available to fit either 4, 5 or 6 bolt pattern hubs
- Weight 430g for complete system

“Pedigree, all-weather
whippet anchors.”
