

SINTESI

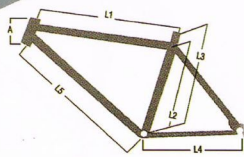

X-WING

Telaio realizzato con tubolari di alluminio EASTON a spessore variabile. Grandi prestazioni, lavorazioni meccaniche tecnologicamente avanzate e un ridottissimo peso, solo 1.300 grammi, pongono questo telaio al vertice della gamma.

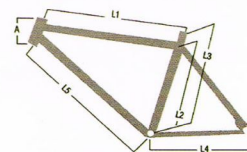

Bicycle frame made of variable thickness EASTON aluminium tubing. High performance, technologically advanced mechanical processing and very light weight, just 1,300 grams, place this frame at the top of the line.

Distributore Esclusivo

THRUSTER

Telaio assemblato con elementi di alluminio della Lega 7000 e carro posteriore a sezione rettangolare per conferire massima rigidità e migliorare la torsione in salita.

Frame assembled with elements of aluminium alloy 7,000 and rear chassis with rectangular cross-section bars to ensure maximum rigidity and improve torsion for hill-climbing.

Colori - colours:
- Argento - Silver

HANTRAX

Telaio full suspended realizzato con tubi e particolari in alluminio. Il movimento ammortizzante "INTAKE SYSTEM" garantisce ottime prestazioni in discesa e su percorsi pedalabili.

Fully suspended frame made of special aluminium tubing. The shock-absorbing "INTAKE SYSTEM" movement ensures excellent performance on downhill runs and along bike trails.
